Shaping the Future of

Agentic Development

Agent Conf brings engineers and builders together to explore
the new agentic way of building software.

AGENT CONF

Everyone is early. That’s why we need to meet.

We are leveraging our strong React Native community to lead 500 engineers over 2 days into the Agentic era.

Focus, community, and a builder mindset at the core of Agent Conf.

PROGRAM

Four angles shaping Agentic Development.

The lineup mixes bleeding-edge tools, practices, and research with production-tested patterns. You can both experience the future and adopt new learnings instantly in your product and team.

 Vibe Coding	 Agentic Engineering Fundamentals
 Prompting as an engineering skill	 Context, memory, tools, and feedback loops
 Knowing when to steer and when to let agents run	 Cost, latency, and failure modes
 Reviewing AI-written code without slowing processes	 Debugging agent behavior
 Orchestration & Multi-Agent Systems	 Adoption & Case Studies
 Splitting work across specialized agents	 Moving from experiments to team workflows
 Coordinating tasks, state, and responsibility	 What scaled, what broke, and what got abandoned
 Human checkpoints and control surfaces	 Measuring impact beyond “it feels faster”

VALUE

Put your brand in front of the teams adopting Agentic Development.

Why sponsor Agent Conf 2026?

Direct Adoption

Put your models, tokens, and IDEs directly into the hands of 500 power users.

Market Positioning

Position your brand as the backbone of the agentic revolution, not just another LLM provider.

Feedback Loop

Get immediate, high-level technical feedback from engineers building complex multi-agent systems.

Talent + Ecosystem

Connect with the developers who are building the tooling your ecosystem will rely on tomorrow.
